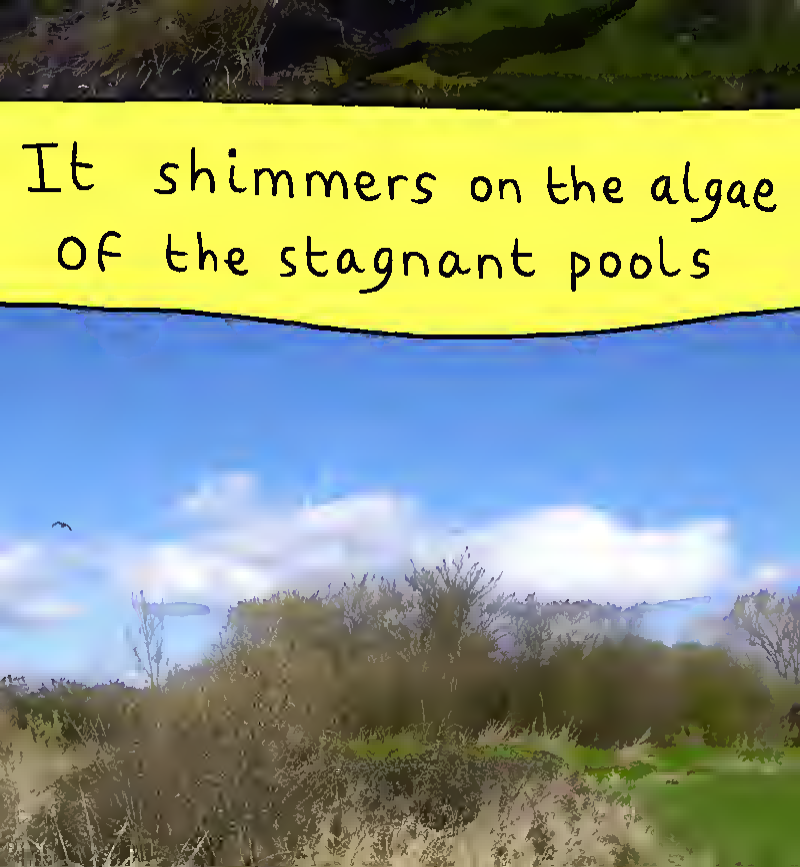
hello
sun

It is the first sunny day of the year

and on the marshes,
the sun is making everything

beautiful.



It shimmers on the algae
of the stagnant pools

& it makes the brambles sparkle.

After a long, bleak winter the sun was unfamiliar

and I thought:
we see the sun's influence

but we can't look at

the sun directly...

it is like the beautiful elephant in the room.

awkward
